

PVG Series Pressure or Vacuum Gauge

(Simple Pressure or Vacuum Tester for Can and Bottle)

The "PVG" series is used to measure pressure or vacuum of can or bottle.

Simply place the sample under the entity manometer or vacuum meter and lower the lever. Then read the value.

Advantages:

- Easy to use
- Available with analog or digital indicator
- Different accuracy class
- Fits all samples

Specifications:

Vacuum range: -1 to 0 bar / -14.5 to 0 psi (Analog)
-100 to 0 kPa (Digital)

Pressure range: 0 to 6 bar

Resolution: on request

Precision: 0.1% to 5% according to model

Weight: 3 Kg

Digital model "PVG-D"
With pressure indicator

Digital model "PVG-D"
With vacuum indicator

PVG-D for PET bottle

“PVG-P” is the portable model for measuring pressure or vacuum into bottle.

Install the PVG-P under the finish neck and adjust the needle on the cap's center, then screw the nut. The needle will pierce the cap without leakage and check the pressure or vacuum value.

PVG-P (Digital)
