

emco MSS Multi Sample Slitter

**For fast production of test strips
for standard-compliant paper testing**

- Double sided precise cut of paper strips from one paper sheet within 4 seconds
- The strip wide of 12 mm beginning and the number of strips are factory side adjustable for customers requirements
- Standard settings for **emco** devices.

e.g. **7 strips within 4 seconds**

6 strips 15 mm; 1 strip 50 mm

- Strip length up to 500 mm
- Special steel knives, self-sharpening
- Basic weight: 40 to 200 g/m²
- Operated by foot pedal
- Weight of the device: 15 kg
- Dimension: (H x W x D)
430 x 460 x 280 mm³

The device is designed as a single sheet cutter. The sample sheet is placed on the metal plate and aligned vertically by means of the knives. When the foot switch is actuated, the sample sheet is grasped, pulled in and the strips are cut. The circular knives and the paper feeder are equipped with a touch protection made of transparent plastic.
