

Flat Type Rapid Sheet Dryer (PL7-C)

1. Specification:

PL7-C is one flat type fast drying device for paper sample, its dry evenly, its surface is smooth and working life is long, it can be working for long time, specially for drying tissue paper.

This device adopts infrared radiation heating board, drying surface is polished mirror surface, the upper cover weight is 23kg, and can press the sample vertically, to make the sample even, flat and drying evenly.

2. Major technical parameters:

- 1) Mirror polished drying surface;
- 2) Can dry long time, digital temperature control;
- 3) Full width elements for uniform heat dispersion.
- 4) Heating power: 2.5KW/220V;
- 5) Paper sample thickness: 0-15mm
- 6) Drying size: 600*350mm
