

## GH-3 Thickness Tester

### Application

This instrument is used to measure thickness of plastic film, thin sheet, paper and other materials or compare the seal condition of plastic packaging bags and packaging containers. It is widely used in industries of packaging, food, daily chemical, pharmaceutical factory and so on.

### Standards

GB/T 6672, ISO 4593, ASTM F 2251

### Features

- ◆ LCD display test data.
- ◆ Can change battery; easy to use.
- ◆ The measurement method is simple and the results are stable and reliable.
- ◆ Small volume, convenient usage.

- ◆ Precise and adjustable multi-function measuring tables are available to purchased.

### Specifications

Item	Technical Parameters
<b>Test range</b>	0.001~12.5mm
<b>Minimum readout</b>	0.001mm
<b>Test precision</b>	1μm
<b>Measure force</b>	0.5~1N
<b>Measure stick size</b>	Φ5mm (can customize)
<b>Measure stick roughness</b>	Ra<0.2μm
<b>Working temperature</b>	0~40℃
<b>Instrument size</b>	280mm x 200mm x 320mm
<b>Weight</b>	6kg

### Configuration List

#### A、 Spare parts

NO.	Name	Remark	Quantity
1	Wooden box		1 PC

#### B、 Optional parts

NO.	Name	Unit	Quantity	Remark
1	Metrology Certificates			Optional
