ZB-BC48 puncture strength tester

◆ Introduction

It is the essential instrument to test the puncture strength of paper and cardboard. automatic reset handle, safe protection, high accuracy, stable performance, counting, and printing are the main features . It's an indispensable instrument. for cardboard box manufacturing plant, research & quality supervision inspection and other enterprises

◆ Standards

ISO3036   GB/T 2679.7

◆ Main Features

1.Computer control technology, open architecture, automatic processes, simple operation, safe and reliable.

2.Automatic measurement, intelligent estimate, operating systems can show results on time

3.Count, print the test results, and has data storage function;

4.English interface, easy to operate

5.Thermal micro-printer, high print speed, low noise, no ink and ribbons, easy to use, low failure rate;

6.Mechanical and electrical integration of modern design, compact structure, elegant appearance and easy maintenance.

◆ Main technical parameters

Power supply	AC220V±10% 50HZ		
Measurement range	A	(1~6)J	indicating error ±0. 05J
	B	(1~12)J	indicating error ±0. 10J
	C	(1~24)J	indicating error ±0. 20J
	D	(1~48)J	indicating error ±0. 50J
	These indicating errors are ensured just in the measurement range of 20%~80%		
Frictional resistance	<0. 25J		
Pyramid dimension	three sides 60*60*60mm height 25±0. 7mm		
	Arris edge fillet radius 1. 5±0. 1mm		
Dimension	800*470*840mm		
Net weight	185kg
