Pneumatic Sheet Press (PL8-A)

1. Specification:

Our PL8-A Standard sheet press is entirely in accordance with ISO 5269/1-TAPPI, T205-SCAN, C26-PAPTAC C4 and other standard design of papermaking.It is used to increase the density and smoothness of the sample, reducing sample moisture, improve the strength of samples.This machine has an automatic timer press, manual timer function pressing, pressing force can be precisely adjusted.

2. Technical parameter:

1).The maximum sample size: 310*310*200mm

2).Standard Pressure: 0.345Mpa

3).Cylinder diameter: 200mm

4).Max Pressure: 0.8Mpa, Pressure control accuracy: 0.001MPa

5).Cylinder maximum output: 25123N

6).Size: 630mm*400mm*1280mm
