

PW -6615B Simulation Transport Vibration Test Machine

Purpose: This machine was applicable to toys, electronics, furniture, gifts, ceramics, packaging and other products to simulate the transport tests. Comply with the U.S. and European transport standards and have characteristic with low noise, reasonable structure, durable, etc.

Basic Standard : Following The EN、ANSI、UL、ASTM、ISTA International Transport Standard

Specification:

Oscillation Frequency	100~300rpm/min, Adjustable
Amplitude	25mm
Vibration Mode	Rotary Vibration (Vertical)
Max Load	60kg
Digital Display Precision	0~999H99M
Equipment Power	AC Invertors Motor
Equipment Structure	Anti-Vibration Pads, Aluminum Adjustment Holder , Aesthetic.
Effective Work Table Size	1000×1000mm
Max Outside Measurement	132×110×81(W×D×H)cm
Weight	About300kg
